INTRODUCTION

Welcome! This home inspection training program has two primary goals:

- To provide you with a sound introduction to the components, materials and mechanics of house systems that you will encounter and evaluate as a home inspector;
- To provide you with a solid understanding of inspection processes, strategies and standards of practice that will help define the scope of your inspections.

We hope you enjoy this training program and develop a good understanding of the various house systems as you proceed. Good luck!

FEATURES OF THIS PROGRAM

This program is structured to help you learn and retain the key concepts of home inspection. It also will help you form a set of best practices for conducting inspections. A number of features are included to help you master the information and put your knowledge into practice:

- Topics are organized into evenly paced Study Sessions. Each Session begins with learning objectives and key words to set up the important concepts you should master by the end of the Session. Each Session concludes with Quick Quizzes to help you test your understanding. Answers to Quick Quizzes are provided so you can check your results.
- Scope and Introduction sections present the ASHI® (American Society of Home Inspectors) Standards of Practice for each major topic. Standards help you define a professional, consistent depth and breadth for your inspections.
- An Inspection Checklist at the end of each section summarizes the important components you will be inspecting and their typical problems. You can use this as a set of field notes during your own inspections.
- The Inspection Tools list will help you build your toolkit of “must have” and optional tools for the job.
- An Inspection Procedures section provides some general guidelines to conducting your inspection of each major house system. This feature will help you develop a methodology to complement your technical knowledge.
- Field Exercises give you an opportunity to turn your knowledge into real world experience.

SUMMARY

The road we have paved for you is designed to be easy and enjoyable to follow. We trust it will lead you quickly to your destination of success in the home inspection profession.

ACKNOWLEDGMENTS

Thanks to Kevin O'Malley for his inspiration, advice and guidance. Thanks also to James Dobney for his invaluable input and encouragement. Special thanks are extended to Dan Friedman for his numerous and significant contributions.

We are grateful for the contributions of: Duncan Hannay, Richard Weldon, Peter Yeates, Tony Wong, Graham Clarke, Ian Cunliffe, Joe Seymour, Charles Gravely, Graham Lobban, Dave Frost, Gerard Gransaul, Jim Stroud, Diana DeSantis, David Ballantyne, Shawn Carr and Steve Liew.

Special thanks are also extended to Susan Bonham, Dearbhla Lynch, Lucia Cardoso-Tavares, Jill Brownlee, Ida Cristello and Rita Minicucci-Colavecchia who have brought everything together. Thanks also to Jim Lingerfelt for his invaluable editing assistance.

► AIR CONDITIONING

	1.0	OBJECTIVES	5
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	8
	2.1	Scope.....	8
	2.2	Introduction.....	16
	3.0	THE BASICS.....	18
STUDY SESSION 2	4.0	AIR CONDITIONING CAPACITY	42
	4.1	Introduction.....	42
	4.2	Conditions	45
	4.2.1	Undersized	45
	4.2.2	Oversized	48
	5.0	COMPRESSOR	49
	5.1	Introduction.....	49
	5.2	Conditions.....	51
	5.2.1	Excess noise/vibration	51
	5.2.2	Short cycling or running continuously.....	53
	5.2.3	Out of level	54
	5.2.4	Excess electric current draw	55
	5.2.5	Wrong fuse or breaker size	56
	5.2.6	Electric wires too small.....	56
	5.2.7	Missing electrical shutoff.....	56
	5.2.8	Inoperative	57
	5.2.9	Inadequate cooling.....	58
STUDY SESSION 3	6.0	CONDENSER COIL (OUTDOOR COIL).....	64
	6.1	Introduction.....	64
	6.2	Conditions.....	64
	6.2.1	Dirty	65
	6.2.2	Damaged/leaking	65
	6.2.3	Corrosion	66
	6.2.4	Clothes dryer or water heater exhaust too close to condenser.....	66
	7.0	WATER-COOLED CONDENSER COIL	67
	7.1	Introduction.....	67
	7.2	Conditions.....	68
	7.2.1	Leakage.....	69
	7.2.2	Coil cooled by pool water.....	70
	7.2.3	No backflow preventer (anti-siphon device)	70
	7.2.4	Low plumbing water pressure.....	71

8.0	EVAPORATOR COIL (INDOOR COIL).....	72
8.1	Introduction	72
8.2	Conditions	75
8.2.1	No access to coil.....	75
8.2.2	Dirty.....	76
8.2.3	Frost.....	77
8.2.4	Top of evaporator dry	78
8.2.5	Corrosion.....	78
8.2.6	Damage.....	78
8.3	Expansion device (metering device)	79
8.3.1	Conditions	80
9.0	CONDENSATE SYSTEM.....	82
9.1	Condensate drain pan (tray)	82
9.1.1	Introduction	82
9.1.2	Conditions	82
9.2	Auxiliary condensate drain pan	83
9.3	Condensate drain line	84
9.3.1	Introduction	84
9.3.2	Conditions	85
9.4	Condensate pump	88
9.4.1	Introduction	88
9.4.2	Conditions	89
10.0	REFRIGERANT LINES	90
10.1	Introduction	90
10.2	Conditions	93
10.2.1	Leaking.....	93
10.2.2	Damage.....	95
10.2.3	Missing insulation	95
10.2.4	Lines too warm or too cold.....	96
10.2.5	Lines touching each other.....	96
11.0	CONDENSER FAN (OUTDOOR FAN).....	102
11.1	Introduction	102
11.2	Conditions	102
11.2.1	Excess noise/vibration.....	103
11.2.2	Inoperative.....	103
11.2.3	Corrosion or mechanical damage	103
11.2.4	Obstructed air flow	104

STUDY SESSION 4

	12.0	EVAPORATOR FAN (INDOOR FAN, PLENUM FAN, BLOWER OR AIR HANDLER)	105
	12.1	Introduction.....	105
	12.2	Conditions	107
	12.2.1	Undersized blower or motor	107
	12.2.2	Misadjustment of belt or pulley	108
	12.2.3	Excess noise/vibration	109
	12.2.4	Dirty fan	110
	12.2.5	Dirty or missing filters	110
	12.2.6	Inoperative.....	111
	12.2.7	Corrosion/mechanical damage	111
	13.0	DUCT SYSTEM.....	112
	13.1	Supply and return ducts.....	112
	13.1.1	Conditions	112
	13.2	Duct insulation	124
	13.2.1	Conditions	125
STUDY SESSION 5	14.0	THERMOSTATS	133
	14.1	Introduction.....	133
	14.2	Conditions	134
	14.2.1	Inoperative	134
	14.2.2	Poor location	135
	14.2.3	Not level.....	136
	14.2.4	Loose.....	137
	14.2.5	Dirty	137
	14.2.6	Damaged	137
	14.2.7	Poor adjustment/calibration	138
	15.0	LIFE EXPECTANCY -	138
	16.0	EVAPORATIVE COOLERS	140
	16.1	Introduction.....	140
	16.2	Conditions	143
	16.2.1	Leaking	143
	16.2.2	Pump or fan inoperative.....	143
	16.2.3	Rust, mold and mildew	144
	16.2.4	No air gap on water supply	144
	16.2.5	No water.....	144
	16.2.6	Poor support for pump and water system	145
	16.2.7	Louvers obstructed.....	145
	16.2.8	Missing or dirty air filter.....	145
	16.2.9	Cabinet too close to grade.....	145
	16.2.10	Cabinet or ducts not weather-tight.....	146
	16.2.11	Electrical problems	146
	16.2.12	Duct problems	146
	16.2.13	Excess noise or vibration	147
	16.2.14	Clogged pads.....	147

SECTION ONE: AIR CONDITIONING

17.0 WHOLE-HOUSE FAN147
17.1 Introduction147
17.2 Conditions149
17.2.1 Inoperative.....149
17.2.2 Inadequate attic venting.....150

18.0 INSPECTION TOOLS154

19.0 INSPECTION CHECKLIST155

20.0 INSPECTION PROCEDURES.....157

21.0 BIBLIOGRAPHY167
ANSWERS TO QUICK QUIZZES168

FIELD EXERCISE 1

► HEAT PUMPS

	1.0	OBJECTIVES	2
STUDY SESSION 1	2.0	INTRODUCTION	5
	3.0	HEAT PUMPS IN THEORY	5
	3.1	The Concept.....	5
	3.2	The Mechanics.....	6
	3.3	Co-Efficient of performance (COP).....	10
	3.4	When the heat pump cannot keep up.....	12
	3.5	Humidity is the enemy.....	14
	3.6	Cost effectiveness.....	15
	3.7	One little twist.....	15
STUDY SESSION 2	4.0	HEAT PUMPS IN PRACTICE	22
	4.1	Undersized or oversized.....	22
	4.2	Heat pumps are similar to air conditioners.....	23
	4.3	Differences between air conditioners and heat pumps.....	23
	4.4	Heat pumps differ from gas and oil furnaces.....	26
	4.5	Defrost cycle.....	26
	4.6	Identifying heat pumps.....	28
	4.7	Conditions.....	29
	4.7.1	Oversized for cooling and undersized for heating.....	33
	4.7.2	Inoperative in heating or cooling mode.....	33
	4.7.3	Poor outdoor coil location.....	34
	4.7.4	Coil iced up.....	35
	4.7.5	Airflow problems in house.....	36
	4.7.6	Back-up heat problems.....	37
	4.7.7	Old.....	39
	4.8	Other types of heat pumps.....	39
	4.8.1	Water-to-air system.....	39
	4.8.2	Earth-to-air system.....	40
	4.8.3	Solar systems.....	42
	4.8.4	Bivalent systems.....	43
	5.0	INSPECTION TOOLS.....	51
	6.0	INSPECTION CHECKLIST.....	52
	7.0	INSPECTION PROCEDURE.....	54
FIELD EXERCISE 1			
	8.0	BIBLIOGRAPHY.....	64
		ANSWERS TO QUICK QUIZZES.....	65
