INTRODUCTION

Welcome! This home inspection training program has two primary goals:

- To provide you with a sound introduction to the components, materials and mechanics of house systems that you will encounter and evaluate as a home inspector;
- To provide you with a solid understanding of inspection processes, strategies and standards of practice that will help define the scope of your inspections.

We hope you enjoy this training program and develop a good understanding of the various house systems as you proceed. Good luck!

FEATURES OF THIS PROGRAM

This program is structured to help you learn and retain the key concepts of home inspection. It also will help you form a set of best practices for conducting inspections. A number of features are included to help you master the information and put your knowledge into practice:

- Topics are organized into evenly paced Study Sessions. Each Session begins with learning objectives and key words to set up the important concepts you should master by the end of the Session. Each Session concludes with Quick Quizzes to help you test your understanding. Answers to Quick Quizzes are provided so you can check your results.
- Scope and Introduction sections present the ASHI® (American Society of Home Inspectors) Standards of Practice for each major topic. Standards help you define a professional, consistent depth and breadth for your inspections.
- An Inspection Checklist at the end of each section summarizes the important components you will be inspecting and their typical problems. You can use this as a set of field notes during your own inspections.
- The Inspection Tools list will help you build your toolkit of “must have” and optional tools for the job.
- An Inspection Procedures section provides some general guidelines to conducting your inspection of each major house system. This feature will help you develop a methodology to complement your technical knowledge.
- Field Exercises give you an opportunity to turn your knowledge into real world experience.

SUMMARY

The road we have paved for you is designed to be easy and enjoyable to follow. We trust it will lead you quickly to your destination of success in the home inspection profession.

ACKNOWLEDGMENTS

Thanks to Kevin O'Malley for his inspiration, advice and guidance. Thanks also to James Dobney for his invaluable input and encouragement. Special thanks are extended to Dan Friedman for his numerous and significant contributions.

We are grateful for the contributions of: Duncan Hannay, Richard Weldon, Peter Yeates, Tony Wong, Graham Clarke, Ian Cunliffe, Joe Seymour, Charles Gravely, Graham Lobban, Dave Frost, Gerard Gransauil, Jim Stroud, Diana DeSantis, David Ballantyne, Shawn Carr and Steve Liew.

Special thanks are also extended to Susan Bonham, Dearbhla Lynch, Lucia Cardoso-Tavares, Jill Brownlee, Ida Cristello and Rita Minicucci-Colavecchia who have brought everything together. Thanks also to Jim Lingerfelt for his invaluable editing assistance.

► SUPPLY PLUMBING

	1.0	OBJECTIVES	3
	1.1	Objectives	3
	1.1.1	General module objectives.....	3
	1.1.2	Supply plumbing section objectives	3
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	6
	2.1	Scope.....	6
	2.2	Introduction.....	6
	3.0	SUPPLY PLUMBING SYSTEM GOALS AND PERFORMANCE	16
STUDY SESSION 2	4.0	PRIVATE WATER SOURCES	37
	4.1	Wells	39
	4.2	Water supply pumps.....	47
	4.2.1	Conditions	55
	4.2.1.1	Inoperative	55
	4.2.1.2	Leaking	56
	4.2.1.3	Excess noise or vibration	56
	4.2.1.4	Wiring problems	57
	4.2.1.5	Short cycling	57
	4.2.1.6	Running continuously	58
	4.2.1.7	Rust	58
	4.2.1.8	Lost prime	59
	4.2.1.9	Damaged	59
	4.2.1.10	Frozen	59
	4.2.1.11	Overheating.....	60
	4.3	Pressure tanks.....	60
	4.3.1	Conditions	63
	4.3.1.1	Rust	64
	4.3.1.2	Leaking	64
	4.3.1.3	Condensation.....	64
	4.3.1.4	Waterlogged	65
	4.3.1.5	Tank wobbling or unstable.....	66
STUDY SESSION 3	5.0	PUBLIC WATER SERVICE	74
	5.1	Service piping (water entry piping)	74
	5.1.1	Conditions	80
	5.1.1.1	Low pressure.....	80
	5.1.1.2	Leaking	81
	5.1.1.3	Freezing.....	82
	5.1.1.4	Mechanical damage	82
	5.2	Shutoff valves	82
	5.2.1	Conditions	85
	5.2.1.1	Missing or cannot be located	85
	5.2.1.2	Leaking	86

SECTION ONE: SUPPLY PLUMBING

	5.2.1.3	Inoperable/inaccessible/buried.....	86
	5.2.1.4	Damaged handle.....	86
	5.2.1.5	Partly closed.....	86
	5.2.1.6	Exposed to mechanical damage	87
	5.2.1.7	Rusted	87
STUDY SESSION 4	5.3	Water pressure regulators.....	93
	5.3.1	Conditions	94
	5.3.1.1	Missing.....	94
	5.3.1.2	No bypass or relief valve	94
	5.3.1.3	Poor location	95
	5.3.1.4	Rust	95
	5.3.1.5	Leaking	95
	5.3.1.6	Set wrong	96
	6.0	SUPPLY PIPING DISTRIBUTION SYSTEM IN THE HOUSE.....	97
	6.1	Conditions	104
	6.1.1	Leaking	104
	6.1.2	Poor pressure or flow	105
	6.1.3	Rust	106
	6.1.4	Split/damaged/crimped	108
STUDY SESSION 5	6.1.5	Poor support	113
	6.1.6	Cross connections	115
	6.1.7	Excess pressure	123
	6.1.8	Excessive noise	124
	6.1.9	Combustible piping.....	126
	6.1.10	Suspect connections on polybutylene piping.....	127
	6.1.11	Non-standard materials	131
	7.0	INSPECTION CHECKLIST.....	135
		ANSWERS TO QUICK QUIZZES.....	136

► WATER HEATERS

	1.0	OBJECTIVES.....	4
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	6
	2.1	Scope	6
	2.2	Introduction	8
STUDY SESSION 2	3.0	FUEL SUPPLY AND VENTING SYSTEMS	26
	3.1	Gas-fired water heaters	26
	3.1.1	Gas meters	26
	3.1.1.1	Conditions.....	26
	3.1.1.1.1	Rusting.....	26
	3.1.1.1.2	Mechanical damage	26
	3.1.1.1.3	Gas shut off and locked	27
	3.1.1.1.4	Ice	27
	3.1.1.1.5	Undersized.....	28
	3.1.1.1.6	Poor access	28
	3.1.1.1.7	Leaks.....	28
	3.1.1.1.8	Poor location.....	29
	3.1.2	Gas piping.....	31
	3.1.2.1	Conditions.....	31
	3.1.2.1.1	Leaks.....	31
	3.1.2.1.2	Inappropriate materials	31
	3.1.2.1.3	Inadequate support.....	32
	3.1.2.1.4	Rusting.....	33
	3.1.2.1.5	No drip leg	33
	3.1.2.1.6	Missing shutoff valves.....	35
	3.1.2.1.7	Improper connections	36
	3.1.2.1.8	Plastic pipe exposed above ground.....	37
	3.1.2.1.9	Piping in chimneys or duct systems	37
	3.1.2.1.10	Copper tubing not properly labeled.....	37
STUDY SESSION 3	3.1.3	Combustion air	42
	3.1.3.1	Conditions.....	42
	3.1.3.1.1	Inadequate combustion air.....	42
	3.1.4	Gas burner	42
	3.1.4.1	Conditions.....	42
	3.1.4.1.1	Inoperative.....	43
	3.1.4.1.2	Scorching.....	43
	3.1.4.1.3	Poor flame color or pattern.....	44
	3.1.4.1.4	Rust.....	44
	3.1.4.1.5	Dirt or soot.....	45
	3.1.4.1.6	Gas odor or leak.....	45
	3.1.5	Venting systems	45
	3.1.5.1	Conditions.....	45
	3.1.5.1.1	Rust.....	46
	3.1.5.1.2	Poor slope	46

SECTION TWO: WATER HEATERS

	3.1.5.1.3	Vent connector too long.....	46
	3.1.5.1.4	Poor support.....	47
	3.1.5.1.5	Poor connections	47
	3.1.5.1.6	Inadequate clearance from combustibles.....	48
	3.1.5.1.7	Vent connector too small or too big for the water heater	49
	3.1.5.1.8	Improper material	51
	3.1.5.1.9	Poor manifolding	51
	3.1.5.1.10	Vent connector extends too far into the chimney	52
	3.1.5.1.11	Spillage at the draft hood.....	54
STUDY SESSION 4	3.2	Oil-fired water heaters	60
	3.2.1	Oil storage tanks	60
	3.2.2	Oil fill and vent pipes	65
	3.2.3	Oil supply lines.....	66
	3.2.4	Oil filter	68
STUDY SESSION 5	3.2.5	Oil burner.....	74
	3.2.6	Primary controller.....	79
	3.2.7	Barometric damper/draft regulator	80
	3.2.8	Vent connector	84
	3.3	Electric water heaters	90
STUDY SESSION 6	4.0	CONVENTIONAL TANK TYPE WATER HEATERS	97
	4.1	Conditions.....	97
	4.1.1	Inoperative (no hot water)	97
	4.1.2	Inadequate capacity or recovery rate.....	98
	4.1.3	Leaking	100
	4.1.4	Rust.....	101
	4.1.5	Gas burner cover or roll out shield missing/damaged/rusted	101
	4.1.6	Damaged tank.....	103
	4.1.7	Inadequate clearance from combustibles.....	103
	4.1.8	Insulation obstructing combustion air or draft hood (gas or oil).....	104
	4.1.9	Poor location.....	104
	4.1.10	Low water pressure and flow	106
	4.1.11	Noisy water heater	106
	4.1.12	Temperature/pressure relief valve problems	107
	4.1.13	Baffle collapsed or missing (gas or oil).....	110
	4.1.14	Tank not stable/wobbly.....	112
	4.1.15	Hot and cold piping reversed.....	112
	4.1.16	No isolating valve	113
	4.1.17	Drain valve problems.....	113
	4.1.18	Propane water heater in low areas	114
STUDY SESSION 7	4.2	Dual water heaters	119
	4.3	Circulating hot water systems	120
	4.3.1	Conditions.....	121
	4.4	Fan assisted gas water heaters	122
	4.4.1	Conditions.....	125

SECTION TWO: WATER HEATERS

5.0 HIGH EFFICIENCY GAS WATER HEATERS.....127
5.1 Direct vent without high efficiency129

6.0 COMBINATION SYSTEMS.....129
6.1 Conditions.....133
6.1.1 Inadequate heat.....133
6.1.2 No hot water or inadequate hot water.....134
6.1.3 No tempering valve134

7.0 TANKLESS COILS.....135
7.1 Conditions.....138
7.1.1 Leaks.....138
7.1.2 No tempering valve138
7.1.3 Poor hot water pressure/flow138
7.2 Instantaneous water heaters139

8.0 INSPECTION CHECKLIST145
ANSWERS TO QUICK QUIZZES146

► DRAIN, WASTE AND VENT PLUMBING

	1.0	OVERVIEW	4
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	8
	2.1	Scope	8
	2.2	Introduction.....	8
	2.2.1	Public and private sewage disposal.....	8
	2.2.1.1	Public sewage disposal	9
	2.2.1.2	Private sewage disposal	9
	2.2.2	Inside the house.....	10
	2.2.3	Traps.....	12
	2.2.4	Vents.....	16
STUDY SESSION 2	3.0	DRAIN PIPING MATERIALS	28
STUDY SESSION 3	3.1	Conditions	37
	3.1.1	Leaks	37
	3.1.2	Rust	38
	3.1.3	Freezing.....	39
	3.1.4	Split/damaged/crimped pipe	39
	3.1.5	Clogged.....	40
	3.1.6	Poor support.....	40
	3.1.7	Cross connections	41
	3.1.8	Undersized	43
	3.1.9	Poor slope.....	43
	3.1.10	Cleanouts missing or inaccessible	44
	3.1.11	Welded steel piping.....	44
STUDY SESSION 4	3.1.12	Exposed to mechanical damage	49
	3.1.13	Pipe size reduced downstream	49
	3.1.14	Galvanized steel pipe buried in soil	49
	3.1.15	Combustible piping.....	49
	3.1.16	Defective ABS piping	50
	3.1.17	Noisy	50
	3.1.18	Non-standard materials and patches	51
	3.1.19	Dishwasher drain connections	51
	3.1.20	Clothes washer drain improper	53
	3.1.21	Condensate drain connections improper.....	54
	3.1.22	Poor manifolding of drain piping.....	55
STUDY SESSION 5	4.0	TRAPS	60
	4.1	Traps losing their seals.....	60
	4.1.1	Conditions	64
	4.1.1.1	Missing.....	65
	4.1.1.2	Wrong type.....	65
	4.1.1.3	Leak.....	66
	4.1.1.4	Double trapping	66
	4.1.1.5	Split, rusted or damaged	67

	4.1.1.6	Freezing.....	67
	4.1.1.7	Tail piece too long.....	68
	4.1.1.8	Trap arm too short or long	71
	4.1.1.9	Trap too small or too big.....	72
	4.1.1.10	Trap primer problems.....	73
	4.1.1.11	Non-standard shape or material	75
	4.1.1.12	Clogged/no cleanout provision	75
STUDY SESSION 6	5.0	FLOOR DRAINS.....	80
	5.1	Conditions.....	80
	5.1.1	Missing.....	80
	5.1.2	Poor location	80
	5.1.3	Backup	81
	5.1.4	Grate missing, rusted or obstructed	82
	5.1.5	No trap	82
	5.1.6	Downspout connection upstream of trap	83
	5.1.7	No primer or poor primer arrangement.....	84
	6.0	VENTING SYSTEMS.....	85
	6.1	Conditions.....	86
	6.1.1	Missing.....	86
	6.1.2	Ineffective	87
	6.1.3	Poor vent pipe arrangements.....	87
	6.1.4	Too small or too long	90
	6.1.5	Island venting problems.....	91
	6.1.6	Vent termination problems.....	92
	6.1.7	Automatic air vents.....	95
STUDY SESSION 7	7.0	SEWAGE EJECTOR PUMPS.....	103
	7.1	Conditions.....	104
	7.1.1	Inoperative	105
	7.1.2	Short cycling or running continuously.....	105
	7.1.3	Odor	105
	7.1.4	No vent.....	106
	7.1.5	Discharge pipe problems.....	106
	7.1.6	Missing, rusting or inoperative union, check valve or gate valve	107
	7.1.7	Alarm sounding.....	107
	7.1.8	Electrical problems	107

8.0	SUMP PUMPS	109
8.1	Conditions	111
8.1.1	Inoperative, poorly secured or rusted	111
8.1.2	Excess noise or vibration	112
8.1.3	Short cycling or running continuously	112
8.1.4	Debris in the sump, clogged sump	113
8.1.5	Sump damaged	113
8.1.6	Discharge pipe problems	113
8.1.7	Lid missing, rotted or not secure	114
8.1.8	Electrical problems	114
9.0	LAUNDRY TUB PUMPS	115
9.1	Conditions	116
9.1.1	Missing	116
9.1.2	Inoperative	116
9.1.3	Short cycling or running continuously	117
9.1.4	Excess noise or vibration	117
9.1.5	Electrical problems	117
9.1.6	Clogged	117
9.1.7	Discharge pipe problems	118
10.0	INSPECTION CHECKLIST	123
	ANSWERS TO QUICK QUIZZES	124
	Appendix A - Septic Systems	131

► PLUMBING FIXTURES AND FAUCETS

	1.0	OVERVIEW.....	4
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	7
	2.1	Scope	7
	2.2	Introduction	9
	3.0	BASINS, SINKS AND LAUNDRY TUBS.....	15
	3.1	Conditions.....	15
	3.1.1	Leaks.....	16
	3.1.2	Rust.....	17
	3.1.3	Surface defects.....	18
	3.1.4	Loose	18
	3.1.5	Overflows missing or inappropriate	19
	3.1.6	Cross connections	19
	3.1.7	Not level	20
	3.1.8	Slow drains	20
STUDY SESSION 2	4.0	FAUCETS.....	26
	4.1	Conditions.....	28
	4.1.1	Leaks or drips	28
	4.1.2	Stiff or inoperative.....	29
