INTRODUCTION

Welcome! This home inspection training program has two primary goals:

- To provide you with a sound introduction to the components, materials and mechanics of house systems that you will encounter and evaluate as a home inspector;
- To provide you with a solid understanding of inspection processes, strategies and standards of practice that will help define the scope of your inspections.

We hope you enjoy this training program and develop a good understanding of the various house systems as you proceed. Good luck!

FEATURES OF THIS PROGRAM

This program is structured to help you learn and retain the key concepts of home inspection. It also will help you form a set of best practices for conducting inspections. A number of features are included to help you master the information and put your knowledge into practice:

- Topics are organized into evenly paced Study Sessions. Each Session begins with learning objectives and key words to set up the important concepts you should master by the end of the Session. Each Session concludes with Quick Quizzes to help you test your understanding. Answers to Quick Quizzes are provided so you can check your results.
- Scope and Introduction sections present the ASHI® (American Society of Home Inspectors) Standards of Practice for each major topic. Standards help you define a professional, consistent depth and breadth for your inspections.
- An Inspection Checklist at the end of each section summarizes the important components you will be inspecting and their typical problems. You can use this as a set of field notes during your own inspections.
- The Inspection Tools list will help you build your toolkit of “must have” and optional tools for the job.
- An Inspection Procedures section provides some general guidelines to conducting your inspection of each major house system. This feature will help you develop a methodology to complement your technical knowledge.
- Field Exercises give you an opportunity to turn your knowledge into real world experience.

SUMMARY

The road we have paved for you is designed to be easy and enjoyable to follow. We trust it will lead you quickly to your destination of success in the home inspection profession.

ACKNOWLEDGMENTS

Thanks to Kevin O'Malley for his inspiration, advice and guidance. Thanks also to James Dobney for his invaluable input and encouragement. Special thanks are extended to Dan Friedman for his numerous and significant contributions.

We are grateful for the contributions of: Duncan Hannay, Richard Weldon, Peter Yeates, Tony Wong, Graham Clarke, Ian Cunliffe, Joe Seymour, Charles Gravely, Graham Lobban, Dave Frost, Gerard Gransauil, Jim Stroud, Diana DeSantis, David Ballantyne, Shawn Carr and Steve Liew.

Special thanks are also extended to Susan Bonham, Dearbhla Lynch, Lucia Cardoso-Tavares, Jill Brownlee, Ida Cristello and Rita Minicucci-Colavecchia who have brought everything together. Thanks also to Jim Lingerfelt for his invaluable editing assistance.

► FOOTINGS AND FOUNDATIONS

	1.0	OBJECTIVES.....	2
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION.....	4
	2.1	Scope.....	4
	2.2	Introduction.....	12
STUDY SESSION 2	3.0	FUNCTIONS, TYPES AND PROBLEMS.....	18
	3.1	Basements, Crawlspace, Slab-On-Grade.....	23
	3.2	Footings and foundation types.....	25
STUDY SESSION 3	3.3	Conditions.....	36
	3.3.1	Cracks.....	36
	3.3.1.1	Shrinkage cracks.....	36
	3.3.1.2	Differential settlement cracks.....	38
STUDY SESSION 4		42
STUDY SESSION 5		56
FIELD EXERCISE 1			
STUDY SESSION 6	3.3.1.3	Cracks due to heaving.....	70
STUDY SESSION 7	3.3.1.4	Cracks due to horizontal forces.....	85
	3.3.2	Bowed, bulging and leaning foundation walls.....	99
STUDY SESSION 8	3.3.3	Mortar deterioration.....	103
	3.3.4	Spalling foundation material.....	104
	3.3.5	Rot, insect or fire damage.....	105
FIELD EXERCISE 2			
STUDY SESSION 9	3.3.6	Piers moving or deteriorating.....	112
	3.3.7	Pilasters or buttresses pulling away from wall.....	115
	3.3.8	Cold joints.....	116
	3.3.9	Honeycombing.....	117
	3.3.10	Prior repairs.....	118
	3.3.11	Foundation walls that are too short.....	119
	3.3.12	Foundation walls that are too thin.....	119
	4.0	INSPECTION TOOLS.....	125
	5.0	INSPECTION CHECKLIST.....	126
		ANSWERS TO QUICK QUIZZES.....	127

► FLOORS

	1.0	OBJECTIVES.....	4
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION.....	7
	2.1	Scope	7
	2.2	Introduction	8
	3.0	SILLS.....	12
	3.1	Conditions	17
	3.1.1	Sills below grade	18
	3.1.2	Rot or insect damage	18
	3.1.3	Gaps under sills	19
	3.1.4	Crushed sills	20
	3.1.5	Poorly anchored.....	21
	3.1.6	Missing	22
STUDY SESSION 2	4.0	COLUMNS	28
	4.1	Conditions	29
	4.1.1	Missing	29
	4.1.2	Settled columns	29
	4.1.3	Crushed.....	30
	4.1.4	Leaning columns	31
	4.1.5	Buckling	31
	4.1.6	Rust.....	33
	4.1.7	Poorly secured at the top or bottom	33
	4.1.8	Mortar deterioration	35
	4.1.9	Spalling concrete or brick.....	35
	4.1.10	Mechanical damage.....	36
	4.1.11	Rot or Insect damage.....	36
	4.1.12	Heaved.....	36
	4.1.13	Prior repairs	36
STUDY SESSION 3	5.0	BEAMS.....	42
	5.1	Conditions	45
	5.1.1	Rust.....	45
	5.1.2	Rot or insect damage	46
	5.1.3	Sag	46
	5.1.4	Inadequate bearing	47
	5.1.5	Rotated or twisted beams	48
	5.1.6	Split or damaged wood beams	49
	5.1.7	Notches or holes	50
	5.1.8	Weak connections of built-up components.....	50
	5.1.9	Weak connections to columns	52
	5.1.10	Weak connections to joists	53
	5.1.11	Lateral support.....	54
	5.1.12	Concentrated loads	56
	5.1.13	Missing beam sections	57

SECTION TWO: FLOORS

	5.1.14	Prior repairs	58
FIELD EXERCISE 1			
STUDY SESSION 4	6.0	JOISTS	69
	6.1	Conditions	74
	6.1.1	Rot and insect damage.....	74
	6.1.2	Sagging joists	75
	6.1.3	End bearing	78
	6.1.4	Rotated or twisted joists	83
	6.1.5	No bridging, blocking or strapping	83
	6.1.6	Notching and holes	84
	6.1.7	Split or damaged joists	85
	6.1.8	Weak cantilevers.....	86
	6.1.9	Weak openings	87
	6.1.10	Prior repairs	88
	6.1.11	Concentrated loads	88
	6.1.12	Missing	90
	6.2	Engineered wood.....	90
	6.2.1	Conditions	92
STUDY SESSION 5	7.0	SUBFLOORING	99
	7.1	Conditions	101
	7.1.1	Rot and insect damage.....	101
	7.1.2	Overspanned or undersized subflooring.....	101
	7.1.3	Damaged or cut subflooring	102
	7.1.4	Cantilevered subflooring	102
	7.1.5	Prior repairs	103
	7.1.6	Concentrated loads	103
	7.1.7	Squeaks.....	103
	7.1.8	Swollen waferboard	103
	7.1.9	Cracked ceramic tiles	103
	8.0	CONCRETE FLOOR SLABS	105
	8.1	Conditions	106
	8.1.1	Cracked.....	106
	8.1.2	Settled.....	108
	8.1.3	Heaved slab	109
	8.1.4	Hollow below	109
	8.1.5	Scaling and dusting	109
	8.1.6	Spalling.....	109
	8.1.7	Rusting rebar	109

FIELD EXERCISE 2

SECTION TWO: FLOORS

9.0	INSPECTION TOOLS.....	118
10.0	INSPECTION CHECKLIST	119
	ANSWERS TO QUICK QUIZZES	120

► WALL SYSTEMS

	1.0	OBJECTIVES.....	3
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION.....	6
	2.1	Scope.....	6
	2.2	Introduction.....	6
	3.0	SOLID MASONRY WALLS.....	7
	3.1	Conditions.....	14
	3.1.1	Cracks.....	14
STUDY SESSION 2	3.1.2	Leaning, bowing or bulging brick.....	29
	3.1.3	Mortar missing or deteriorated.....	35
	3.1.4	Deterioration of the masonry.....	35
	3.1.5	Efflorescence.....	36
	3.1.6	Too close to grade.....	37
	3.1.7	Wavy bricks.....	37
	3.1.8	Excess corbelling.....	37
	3.1.9	Bricks or blocks on their side.....	39
	3.1.10	Prior repairs.....	40
STUDY SESSION 3	4.0	WOOD FRAME WALLS.....	45
	4.1	Conditions.....	63
STUDY SESSION 4	4.1.1	Rot and insect damage.....	63
	4.1.2	Leaning.....	66
	4.1.3	Bowing or buckling.....	67
	4.1.4	Excessive holes, notching or mechanical damage.....	69
	4.1.5	Sagging top plate or concentrated loads.....	71
	4.1.6	Lack of fire stopping.....	75
	4.1.7	Sagging lintels.....	75
FIELD EXERCISE 1			
STUDY SESSION 5	5.0	MASONRY VENEER WALLS.....	85
	5.0.1	Vented rain screen principle.....	87
	5.0.2	Identifying masonry veneer walls.....	90
	5.1	Conditions.....	91
	5.1.1	Cracked.....	91
	5.1.2	Bowing or leaning.....	92
	5.1.3	Mortar missing or deteriorating.....	92
	5.1.4	Deterioration of the brick or stone itself.....	93
	5.1.5	Missing or obstructed weep holes.....	93
	5.1.6	Missing or ineffective flashings.....	94
	5.1.7	Efflorescence.....	94
	5.1.8	Too close to grade.....	94
	5.1.9	Wavy brick walls.....	94
	5.1.10	Excess corbelling.....	95
	5.1.11	Bricks on their sides.....	95
	5.1.12	Sagging lintels.....	95

SECTION THREE: WALL SYSTEMS

	5.1.13	Prior repairs	96
STUDY SESSION 6	6.0	ARCHES AND LINTELS	101
	6.1	Conditions	105
	6.1.1	Missing	105
	6.1.2	Cracks	105
	6.1.3	Mortar deteriorating or missing.....	107
	6.1.4	Masonry resting on wood	107
	6.1.5	Stone or brick deterioration	107
	6.1.6	Sagging, leaning or rotating lintels or arches	107
	6.1.7	Endbearing	108
	6.1.8	Rust.....	109
	6.1.9	Rot and insect damage.....	109
<u>FIELD EXERCISE 2</u>			
	7.0	INSPECTION TOOLS.....	116
	8.0	INSPECTION CHECKLIST	117
		ANSWERS TO QUICK QUIZZES	118

► ROOF FRAMING

	1.0	OBJECTIVES.....	3
STUDY SESSION 1	2.0	SCOPE AND INTRODUCTION	6
	2.1	Scope	6
	2.1	Introduction	7
STUDY SESSION 2	3.0	RAFTERS, ROOF JOISTS AND CEILING JOISTS	17
STUDY SESSION 3	3.1	Conditions	33
	3.1.1	Sagging rafters and/or ridge	33
	3.1.2	Rafter spread	34
	3.1.3	Poor endbearing.....	36
	3.1.4	Weak connections.....	37
	3.1.5	Weak framing at openings.....	39
	3.1.6	Rot or insect damage.....	40
	3.1.7	Mechanical damage or splitting	41
	3.1.8	Fire damage.....	42
STUDY SESSION 4	4.0	COLLAR TIES.....	46
	4.1	Conditions	48
	4.1.1	Missing.....	48
	4.1.2	Buckling	48
	4.1.3	Rot and insect damage.....	49
	4.1.4	Mechanical damage or splitting	49
	4.1.5	Fire damage.....	49
	5.0	KNEE WALLS AND PURLINS	49
	5.1	Conditions	51
	5.1.1	Buckling, bowing or leaning	51
	5.1.2	Sagging rafters.....	51
	5.1.3	Sagging top plate on knee walls.....	52
	5.1.4	Sagging purlins.....	52
	5.1.5	Weak connections.....	53
	5.1.6	Rot and insect damage.....	53
	5.1.7	Mechanical damage or splitting	53
	5.1.8	Fire damage.....	53
FIELD EXERCISE 1			
STUDY SESSION 5	6.0	TRUSSES	59
	6.1	Conditions	63
	6.1.1	Truss sag.....	63
	6.1.2	Truss uplift.....	64
	6.1.3	Buckled webs	68
	6.1.4	Weak connections.....	68
	6.1.5	Rotation or lateral movement.....	69
	6.1.6	Poor endbearing.....	69
	6.1.7	Notches and holes.....	70
	6.1.8	Rot and insect damage.....	70

SECTION FOUR: ROOF FRAMING

	6.1.9	Mechanical damage or splitting	70
	6.1.10	Fire damage	70
STUDY SESSION 6	7.0	WOOD “I” JOISTS	74
	7.1	Conditions	74
	7.1.1	Bird’s mouths	74
	7.1.2	Toe bearing	74
	7.1.3	No ridge beam	75
	8.0	ROOF SHEATHING	75
	8.1	Conditions	79
	8.1.1	Sagging sheathing	79
	8.1.2	Buckled plywood, waferboard, or OSB	80
	8.1.3	Delaminated plywood	80
	8.1.4	Deteriorated FRT plywood.....	80
	8.1.5	Rot and insect damage.....	80
	8.1.6	Mechanical damage or splitting	80
	8.1.7	Fire damage	81
FIELD EXERCISE 2	9.0	SEISMIC AND WIND RESISTANCE.....	81
	9.1	Earthquake.....	81
	9.1.1	Conditions	84
	9.2	Hurricanes	84
	9.2.1	Conditions	85
	10.0	INSPECTION TOOLS	89
	11.0	INSPECTION CHECKLIST	90
	12.0	STRUCTURE INSPECTION PROCEDURE	91
	13.0	BIBLIOGRAPHY	97
		ANSWERS TO QUICK QUIZZES	99
